TRACSOLANA, THE ONLY SOLANA COMPANION YOU NEED

Understanding The Problem

- Checking the Solana portfolio can be too complicated with present-day tools and may not be understandable by most people.
- We aim to solve this problem by simplifying the interface between the user and the database

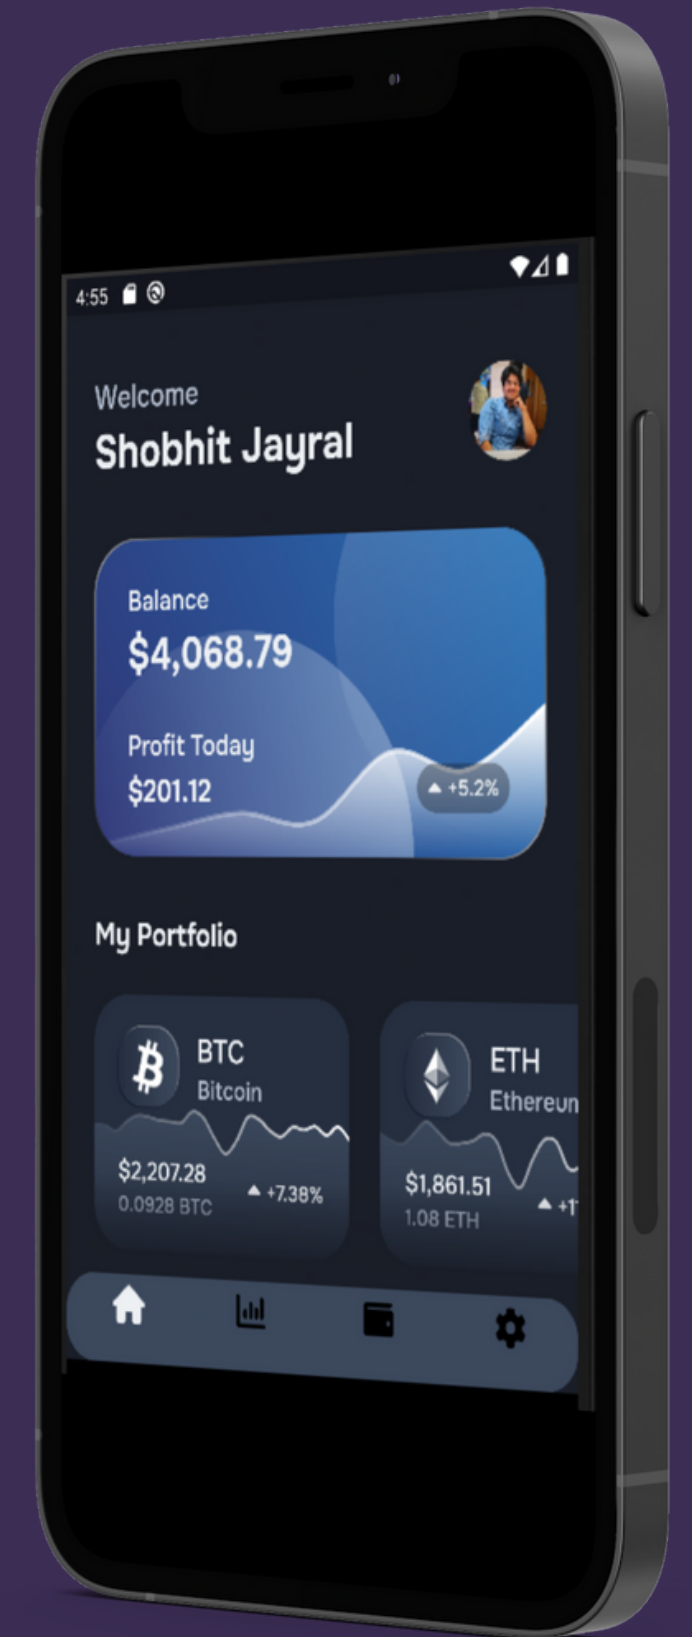

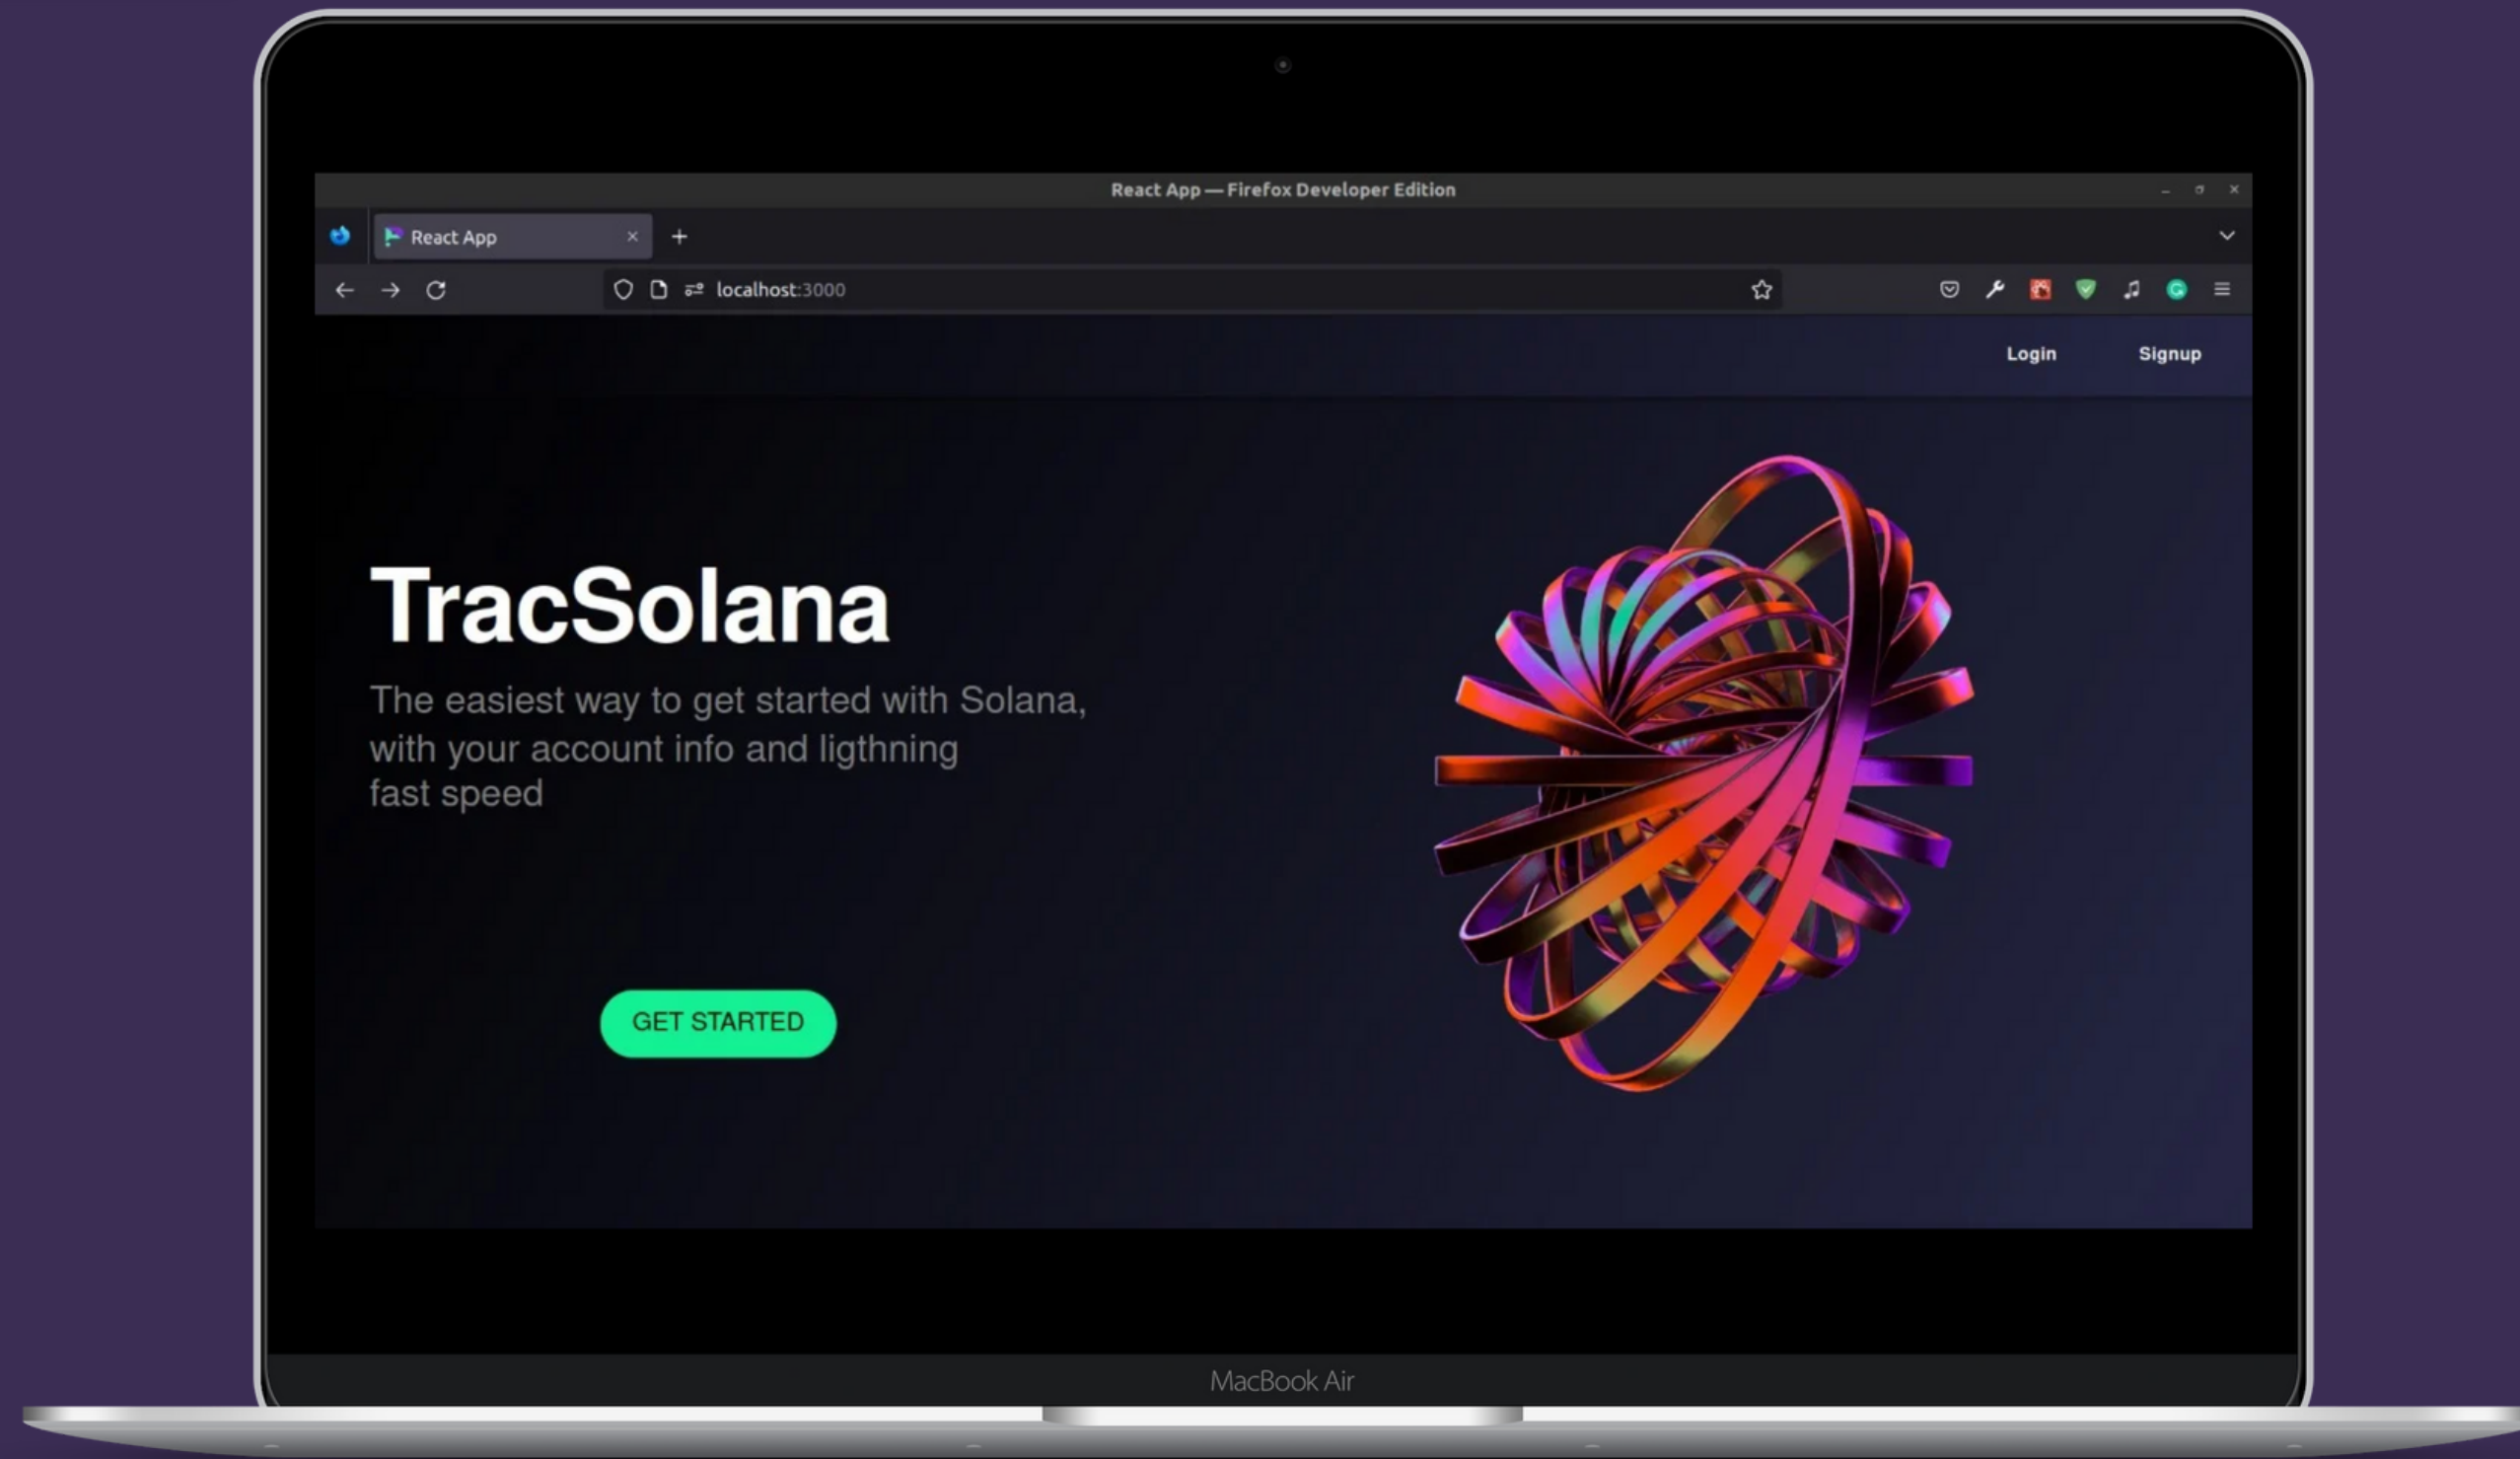

How TracSolana solve this problem

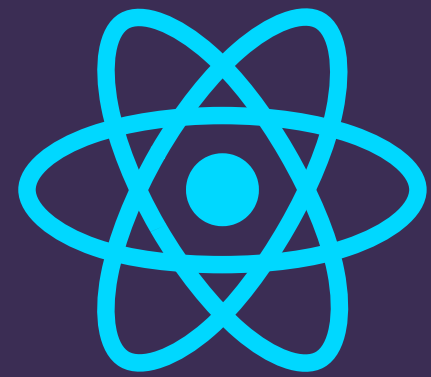

- TracSolana basically works On UI between solana ecosystem and user. It Gives the user an easy to use webApp interface.
- The sign in process based on JSON architecture. It's easy to sign in just you have to enter your solana address.
- After you have enter your address they verify your account (by using moralis SDK),then your solana account show your:
 - Solana balance
 - NFT Metadata
 - Token balance
 - Transaction

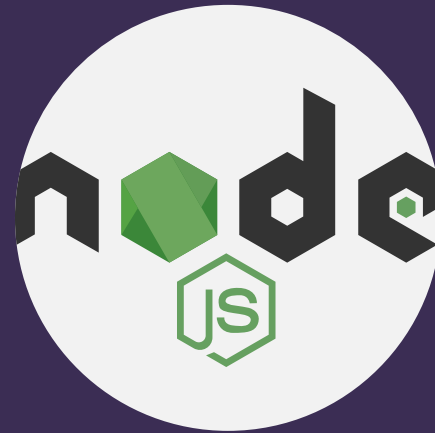

TracSolana is everywhere
